## Top 90 Composite Sash Classic Multi-tasking in its most beautiful form

- Slender sash profiles, available in many colour and surface textures
- Integrated 35 mm venetian blind for sun and sight protection, built in between the glass panes. Venetian blind can be operated manually or electronically. Glass panes can be opened for maintenance and cleaning of the venetian blind.
- Very good thermal insulation through triple glazing and multi-chamber frame and sash profiles
- Excellent acoustic insulation due to sandwich construction, with large spaces between panes, triple glazing and multiple gaskets.
- Available in PVC and in PVC with exterior aluminium cladding

## Top 90 Composite Sash Nova Contemporary look, innovative technology

- Integrated 25 mm venetian blind for sun and sight protection, built in between the glass panes. Glass panes can be opened for maintenance and cleaning of the venetian blind.
- “More glass, less frame”, contemporary look. Sash profile is hardly visible from exterior, increasing the glazed area.
- Very good thermal insulation through triple glazing and multi-chamber frame and sash profiles
- Excellent acoustic insulation due to sandwich construction, with large spaces between panes, triple glazing and multiple gaskets.
- Many choices for colour and surface textures
- Available in PVC and in PVC with exterior aluminium cladding
